1. **Source of Data:** Import documents collected by Canada Customs are the basic source of import statistics, except for data on imports of electricity, which are reported by the importing firms directly to Statistics Canada.

2. **Timing:** Import statistics for any month include goods declared on import entries received at Statistics Canada up to the last working day in the month. Generally speaking, compilation is based on a statistical month rather than a calendar month: e.g. imports of motor vehicles from the U.S.A. cover the period from the 26th of one month to the 25th of the following month. There could also be a lapse of up to a week in the receipt of documents from outlying customs ports. Electricity imports are included in statistics for the month following that in which these imports actually occurred.

3. **Coverage:** Import statistics include all goods which are cleared by Customs on arrival in Canada, together with goods which are entered into customs warehouses. The following commodity movements *are excluded* from import statistics (being however recorded separately as Special Transactions – Non-trade in Table 4): gold and gold products where the value of the gold content is 80 per cent or more of the total value, including coin; settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign representatives in Canada or brought back by Canadians returning from postings abroad; temporary imports for exhibition or competition, including films. Bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad, temporary imports and goods merely moving in transit through Canadian territory are not reflected in any of the statistics.

4. **Classification:** Commodities are classified to the *Imports Commodity Classification* (MCC), a 5-digit classification based on the "Standard Commodity Classification" (cf.Cat.12-502, Statistics Canada). Full descriptions of each commodity code in the MCC are provided in "Trade of Canada Commodity Classification" (cf. Cat. 12-520, Statistics Canada), which is distributed free on request to subscribers of Imports by Commodities (cf. Cat. 65-007, Statistics Canada). This is a new volume, intended to assist users of the monthly export and import trade statistics. The three volume coding manual, Import Commodity Classification (cf. Cat. 12-524, 12-525 and 12-526, Statistics Canada) no longer is on sale to the public. Importers, when reporting to the Department of National Revenue, Customs and Excise Branch, use an expanded version of the MCC coded at the 7-digit level – "The Canadian International Trade Classification."

5. **Country and area of consignment:** Imports are classified to the country from which goods are consigned to Canada, except for goods originating in Central or South America but consigned to Canada from the United States. These goods are credited to the country of origin. Statistics are compiled and presented for the individual countries listed on page 8 of this report. Countries are arranged primarily according to geographical location, but they are also grouped by affiliation to trading blocs and by tariff arrangements (e.g. E.E.C. and Commonwealth and preferential countries). In the statistics shown in this report, *European Economic Community excludes Denmark, Ireland and the United Kingdom, new members from January 1, 1973.*

1. **Source des données:** La statistique des importations se fonde principalement sur les documents d'importation recueillis par les Douanes du Canada, sauf dans le cas des importations d'électricité, qui sont déclarées directement à Statistique Canada par les compagnies importatrices.

2. **Périodes de temps:** La statistique des importations pour un mois quelconque comprend les marchandises déclarées dans les documents d'importation parvenus à SC durant ce mois, jusqu'au dernier jour ouvrable inclus. En général, le calcul est basé sur un mois fixé pour les besoins de la statistique plutôt que sur un mois civil: par ex. les importations de véhicules automobiles des Etats-Unis couvrent la période du 26 d'un mois au 25 du mois suivant. Il peut également y avoir un décalage d'une semaine avant l'arrivée des documents provenant des postes de douane éloignés. Les importations d'électricité sont comprises dans la statistique du mois suivant celui où elles ont effectivement eu lieu.

3. **Couverture:** La statistique des importations comprend toutes les marchandises dédouanées dès leur arrivée au Canada plus les marchandises entreposées à la douane. Les mouvements de marchandises suivants *sont exclus* de la statistique des importations (ils sont toutefois classés séparément comme Transactions spéciales-hors commerce, au tableau 4); l'or et les articles en or dont la valeur de la teneur en or représente 80 pour cent de la valeur totale, y compris la monnaie; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes exempts de douane; les marchandises importées par des diplomates étrangers au Canada ou rapportées par les Canadiens rentrant de leur service à l'étranger; les importations provisoires pour des expositions ou des concours, y compris les films. Les approvisionnements de soute et de bord achetés à l'étranger par les navires et les avions canadiens, les importations provisoires et les marchandises ne faisant que passer par le territoire canadien, ne figurent dans aucune statistique.

4. **Classification:** Les marchandises sont classées dans la "Classification des marchandises d'importation" (MCC) qui est la classification à 5 chiffres basée sur la "Classification type des marchandises" (no 12-502 au cat. de Statistique Canada). Une description complète du contenu de chaque code de marchandises dans cette classification (MCC) se trouve dans la "Classification des marchandises pour le commerce du Canada" (no 12-520 au cat. de Statistique Canada), que les abonnés de la publication "Importations par marchandises" (no 65-007 au cat. de Statistique Canada) peuvent se procurer sans frais sur demande. Ce nouveau volume est destiné à aider les utilisateurs de statistiques mensuelles sur les importations et les exportations. Le manuel de codage en trois volumes intitulé "Classification des marchandises d'importation" (nos 12-524, 12-525 et 12-526 de Statistique Canada) n'est plus disponible au public. Lorsqu'ils doivent déclarer des marchandises au ministère du Revenue national, Direction douanes et accise, les importateurs utilisent une version étendue de la classification (MCC) codée au niveau de 7 chiffres, soit la "Classification canadienne pour le commerce interantional."

5. **Pays et région de consignation:** Les importations sont classées selon le pays dans lequel elles ont été consignées à destination du Canada, sauf en ce qui concerne les marchandises provenant de l'Amérique centrale ou de l'Amérique du Sud qui sont expédiées au Canada par les Etats-Unis; ces marchandises sont attribuées au pays d'origine. Les données statistiques sont calculées et présentées pour chaque pays mentionné à la page 9 de la présente publication. Les pays sont disposés surtout selon leur situation géographique, mais ils sont également répartis d'après leur affiliation à des groupes commerciaux et leurs accords tarifaires (par ex. les pays de la C.E.E., ceux du Commonwealth et les pays qui jouissent d'un tarif préférentiel). Dans les statistiques qui figurent dans la présente publication, *la Communauté économique européenne n'inclut pas le Danemark, l'Irlande et le Royaume-Uni, nouveaux membres depuis le 1er janvier 1973.*

6. **Quantities:** Tables 3 and 4 show quantities, where available, in terms of the units specified for each class in the "Import Commodity Classification," (cf. above), and defined on page 7 of this report. Measures of weight or volume generally exclude any packing required for shipment and numbers refer to complete (or substantially complete) units imported, excluding parts.

7. **Valuation:** The value of goods imported is based on the selling price f.o.b. point of shipment reported by importers. However, in the case of shipments valued under $50,000 or transactions between affiliated companies (other than automotive imports from the U.S.), the value recorded is the value for customs duty purposes determined according to the provisions of the Custom Act. All values in this report are presented in thousands of dollars, after appropriate rounding. Where the current or cumulative amount is less than $500, only quantity may be published for the country concerned. On account of rounding individually, differences may arise between totals and sums of constituent items.

8. **Abbreviations:** Designations of countries and commodities used in this report are often abbreviated or shortened. A key to abbreviations of countries appears on page 8 of this report, and comprehensive descriptions of commodities appear in the "Import Commodity Classification". The letters "n.e.s." mean "not elsewhere specified".

9. **Revisions:**

   a. **Data for current month:** Statistics for the current month (i.e. the month which is subject of the report) in the "Preliminary Statement of Canadian Trade" and in the Summary of External Trade (65-001) have not been audited for reporting or processing errors with the exception of transactions of $100,000 or more. Figures for the current month in Imports by Commodities (65-007), Exports by Commodities (65-004), Imports by Countries (65-006) and Exports by Countries (65-003) are fully audited.

   b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the reports for December have been published. Commodity/country subtotals revised by $10,000 or more are shown in the monthly report 65-007 and 65-004 in the month following their application (e.g. report 65-007 for June will show data revised in May for the months January through April of the current year).

   c. **Monthly data for previous years:** Data for any year previous to the current year are subject to revision only in March of each year. Any monthly commodity/country figures revised at that time will be shown in the March issues of reports 65-007 and 65-004.

   Note: Cumulative totals in all reports reflect all revisions applied up to the date of printing.

10. **Treatment of Confidential Information:** It is occasionally necessary to withhold publication of details where commodity or country information is known to involve disclosure. The suppression of commodity-by-country detail, however, affects neither class nor country totals, which include all transactions reported during the calendar month.

6. **Quantités:** Les tableaux 3 et 4 donnent les quantités, lorsqu'elles sont disponibles, exprimées dans l'unité déterminée pour chaque classe dans la "Classification des marchandises d'importation," (mentionnée ci-dessus); les unités sont définies à la page 7 du présent rapport. Les poids ou les volumes sont mesurés nets de l'emballage nécessaire à l'expédition et les nombres représentent le nombre d'articles complets (ou presque complets) importés, sans les pièces.

7. **Valeurs:** La valeur des marchandises importées est basée sur le prix de vente, f. à b., au point d'expédition déclaré par les importateurs. Toutefois, dans le cas des expéditions d'une valeur inférieure à $50,000 ou des transactions entre des sociétés affiliées (autres que les importations d'automobiles des Etats-Unis), la valeur déclarée est celle fixée aux fins des douanes, en vertu de la Loi canadienne sur les douanes. Toutes les valeurs qui paraissent dans le présent rapport sont indiquées en milliers de dollars, après avoir été arrondies. Lorsque la valeur cumulative ou courante est inférieure à $500, seule la quantité peut être publiée pour le pays concerné. Etant donné que l'on a arrondi chaque valeur, il est possible que les totaux ne correspondent pas aux sommes des éléments constitutifs.

8. **Abréviations:** Les noms des pays et des marchandises cités dans le présent rapport sont souvent abrégés ou raccourcis. L'explication des abréviations des pays est donnée à la page 9 du présent rapport, tandis que les descriptions complètes des marchandises figurent dans la "Classification des marchandises d'importation," (mentionnée ci-dessus). Les lettres "n.d.a." signifient "non désigné ailleurs".

9. **Rectifications:**

   a. **Données du mois courant:** Les statistiques du mois courant (c.-à-d. le mois visé dans la publication) figurant dans le "Communiqué préliminaire sur le commerce du Canada", le Sommaire du commerce extérieur (65-001) n'ont pas été vérifiées quant aux erreurs de déclaration et de traitement à l'exception des opérations d'au moins $100,000. Les chiffres du mois courant dans Importations par marchandises (65-007), Exportations par marchandises (65-004), Importations par pays (65-006) et Exportations par pays (65-003) ont fait l'objet d'une vérification complète.

   b. **Données des mois précédents de l'année courante:** Les chiffres des mois précédents de l'année courante demeurent sujets à révision jusqu'à la parution des publications pour décembre. Les totaux rectifiés par $10,000 ou plus au niveau de marchandise/pays figurent dans les publications mensuelles 65-007 et 65-004 du mois qui suit leur application (par ex., le numéro de juin de la publication 65-007 présentera les données qui ont été rectifiées en mai pour les mois de janvier à avril de l'année courante).

   c. **Données mensuelles des années précédentes:** Les données pour toute année antérieure à l'année courante sont sujettes à révision seulement en mars de chaque année. Les chiffres mensuels par marchandises/pays qui seront rectifiées à ce moment-là paraîtront dans les éditions de mars des publications 65-007 et 65-004.

   Nota: Les totaux cumulatifs figurant dans toutes les publications prennent en compte toutes les rectifications apportées jusqu'à la date d'impression.

10. **Renseignements confidentiels:** Il est parfois nécessaire de supprimer le détail des données relativement à certaines marchandises ou à certains pays pour protéger le caractère confidentiel des données individuelles. La suppression du détail des marchandises par pays ne modifie toutefois pas les totaux par classe ou pays, qui comprennent toutes les opérations dont il a été fait rapport au cours du mois civil.

Commencing January 1, 1975, documents of imports from the United States valued at less than $2,500 each have been subject to a 10 per cent systematic sample to provide estimates for low-value imports from that country. Import documents from the U.S. exceeding $2,500 and all import documents from other countries, regardless of value, continue to be processed and compiled by complete count.

All documents are stored into homogeneous commodity groupings according to tariff item information on the document. The low-value documents covering imports from the U.S. are selected from each commodity grouping and are subject to a systematic sample with a random start.

Once the document is selected through the sample procedure, the value, quantity and customs duty of each sample line are mechanically inflated by dividing by the sampling ratio. For example, if the sampling ratio were 1/10, all lines shown on the sampled documents would be multiplied by 10, and the estimates thus derived are included with the complete count statistics.

It should be noted that the aggregate value of low-value documents of U.S. imports accounts for 4 per cent to 5 per cent of the import total, (6 per cent to 8 per cent for imports from the U.S.) but accounts for some 55 per cent of all documents (some 70 per cent of documents for imports from the U.S.).

The estimated $140 million a month of low-value U.S. imports is subject to a sampling variability of 2 per cent to 3 per cent. This means that there is a 2 in 3 chance of the estimated value differing from the "true" value by not more than 2 per cent to 3 per cent.

Estimates for individual commodity classes are of course subject to varying degrees of sampling variability. The closeness of individual estimation to "true" values also varies with the universe of documents selected for the particular class in any particular sample. While it is difficult to represent this in tabular form, readers should be aware that the odds against a particular estimate being close to the true value by a specified percentage increase quite rapidly as the universe of documents upon which the estimate is based decreases.

Depuis le 1er janvier 1975, on établit à partir d'un échantillon systématique de 10 p. 100 des documents concernant les importations d'une valeur inférieure à $2,500 des estimations sur les marchandises de faible valeur importées des Etats-Unis. Les données sur les marchandises valant plus de $2,500 importées des Etats-Unis et sur toutes les marchandises importées des autres pays, quelle qu'en soit la valeur, continueront d'être dépouillées et compilées exhaustivement.

Tous les documents sont répartis en groupes homogènes de marchandises, suivant les groupes du tarif douanier. Sur chaque groupe, on prélève les documents sur les marchandises de faible valeur importées des Etats-Unis et on procède à un sondage systématique dont le premier élément est choisi au hasard.

Pour chaque document sélectionné par sondage, on gonfle automatiquement la valeur, la quantité et les droits de douane figurant sur chaque ligne, en les divisant par le taux d'échantillonnage. Par exemple, si le taux d'échantillonnage est de 1/10, les données sur chaque ligne des documents sélectionnées sont multipliées par 10 et les estimations ainsi calculées sont incorporées aux résultats de la compilation exhaustive.

Il convient de noter que les documents sur les importations de faible valeur en provenance des Etats-Unis représentent de 4 p. 100 à 5 p. 100 de la valeur globale des importations (de 6 p. 100 à 8 p. 100 des marchandises importées des Etats-Unis), mais quelque 55 p. 100 de l'ensemble des documents (environ 70 p. 100 des documents sur les importations des Etats-Unis).

Vu qu'elle résulte d'un sondage, la valeur estimative des marchandises de faible valeur importées chaque mois des Etats-Unis (140 millions de dollars) peut varier de 2 à 3 p. 100 par rapport à la valeur "réelle". Cela veut dire que, dans 2 cas sur 3, la valeur estimative ne diffère pas de la valeur réelle de plus de 2 ou 3 p. 100.

La variabilité de sondage des estimations peut varier d'une catégorie de marchandises à une autre. L'écart entre chaque estimation et la valeur "réelle" varie également, dans tout sondage, en fonction de l'univers de documents sélectionné pour chaque catégorie. Il est difficile de représenter ceci sous forme de tableau, mais le lecteur ne doit pas oublier que le nombre de chances d'obtenir une estimation ne différant pas de la valeur réelle de plus de tel pourcentage diminue rapidement si l'univers de documents qui sert de base à l'estimation se restreint.

BBL ..... Barrels

CARAT ..... Carats

1. **Source of Data:** Import documents collected by Canada Customs are the basic source of import statistics, except for data on imports of electricity, which are reported by the importing firms directly to Statistics Canada.

2. **Timing:** Import statistics for any month include goods declared on import entries received at Statistics Canada up to the last working day in the month. Generally speaking, compilation is based on a statistical month rather than a calendar month: e.g. imports of motor vehicles from the U.S.A. cover the period from the 26th of one month to the 25th of the following month. There could also be a lapse of up to a week in the receipt of documents from outlying customs ports. Electricity imports are included in statistics for the month following that in which these imports actually occurred.

3. **Coverage:** Import statistics include all goods which are cleared by Customs on arrival in Canada, together with goods which are entered into customs warehouses. The following commodity movements *are excluded* from import statistics (being however recorded separately as Special Transactions — Non-trade in Table 4): gold and gold products where the value of the gold content is 80 per cent or more of the total value, including coin; settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign representatives in Canada or brought back by Canadians returning from postings abroad; temporary imports for exhibition or competition, including films. Bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad, temporary imports and goods merely moving in transit through Canadian territory are not reflected in any of the statistics.

4. **Classification:** Commodities are classified to the *Imports Commodity Classification* (MCC), a 5-digit classification based on the "Standard Commodity Classification" (cf.Cat.12-502, Statistics Canada). Full descriptions of each commodity code in the MCC are provided in "Trade of Canada Commodity Classification" (cf. Cat. 12-520, Statistics Canada), which is distributed free on request to subscribers of Imports by Commodities (cf. Cat. 65-007, Statistics Canada). This is a new volume, intended to assist users of the monthly export and import trade statistics. The three volume coding manual, Import Commodity Classification (cf. Cat. 12-524, 12-525 and 12-526, Statistics Canada) no longer is on sale to the public. Importers, when reporting to the Department of National Revenue, Customs and Excise Branch, use an expanded version of the MCC coded at the 7-digit level — "The Canadian International Trade Classification."

5. **Country and area of consignment:** Imports are classified to the country from which goods are consigned to Canada, except for goods originating in Central or South America but consigned to Canada from the United States. These goods are credited to the country of origin. Statistics are compiled and presented for the individual countries listed on page 8 of this report. Countries are arranged primarily according to geographical location, but they are also grouped by affiliation to trading blocs and by tariff arrangements (e.g. E.E.C. and Commonwealth and preferential countries). In the statistics shown in this report, *European Economic Community excludes Denmark, Ireland and the United Kingdom, new members from January 1, 1973.*

1. **Source des données:** La statistique des importations se fonde prin palement sur les documents d'importation recueillis par les Douan du Canada, sauf dans le cas des importations d'électricité, qui so déclarées directement à Statistique Canada par les compagnies i portatrices.

2. **Périodes de temps:** La statistique des importations pour un mo quelconque comprend les marchandises déclarées dans les doc ments d'importation parvenus à SC durant ce mois, jusqu'au dern jour ouvrable inclus. En général, le calcul est basé sur un mois fi pour les besoins de la statistique plutôt que sur un mois civil: par e les importations de véhicules automobiles des Etats-Unis couvrent période du 26 d'un mois au 25 du mois suivant. Il peut égalemen avoir un décalage d'une semaine avant l'arrivée des documen provenant des postes de douane éloignés. Les importations d'élect cité sont comprises dans la statistique du mois suivant celui où ell ont effectivement eu lieu.

3. **Couverture:** La statistique des importations comprend toutes l marchandises dédouanées dès leur arrivée au Canada plus les ma chandises entreposées à la douane. Les mouvements de marchanc ses suivants *sont exclus* de la statistique des importations (ils so toutefois classés séparément comme Transactions spéciales-ho commerce, au tableau 4); l'or et les articles en or dont la valeur de teneur en or représente 80 pour cent de la valeur totale, y compris monnaie; les effets d'immigrants; les dons et cadeaux privés; l achats des touristes exempts de douane; les marchandises importé par des diplomates étrangers au Canada ou rapportées par l Canadiens rentrant de leur service à l'étranger; les importatio provisoires pour des expositions ou des concours, y compris les film Les approvisionnements de soute et de bord achetés à l'étranger p les navires et les avions canadiens, les importations provisoires et l marchandises ne faisant que passer par le territoire canadien, n figurent dans aucune statistique.

4. **Classification:** Les marchandises sont classées dans la "Classifica tion des marchandises d'importation" (MCC) qui est la classificatio à 5 chiffres basée sur la "Classification type des marchandises" (n 12-502 au cat. de Statistique Canada). Une description complète d contenu de chaque code de marchandises dans cette classificatio (MCC) se trouve dans la "Classification des marchandises pour l commerce du Canada" (no 12-520 au cat. de Statistique Canada que les abonnés de la publication "Importations par marchandises (no 65-007 au cat. de Statistique Canada) peuvent se procurer san frais sur demande. Ce nouveau volume est destiné à aider le utilisateurs de statistiques mensuelles sur les importations et le exportations. Le manuel de codage en trois volumes intitulé "Classi fication des marchandises d'importation" (nos 12-524, 12-525 et 12 526 de Statistique Canada) n'est plus disponible au public. Lors qu'ils doivent déclarer des marchandises au ministère du Revenu national, Direction douanes et accise, les importateurs utilisent un version étendue de la classification (MCC) codée au niveau de chiffres, soit la "Classification canadienne pour le commerce interna tional."

5. **Pays et région de consignation:** Les importations sont classées selo le pays dans lequel elles ont été consignées à destination du Canada sauf en ce qui concerne les marchandises provenant de l'Amériqu centrale ou de l'Amérique du Sud qui sont expédiées au Canada pa les Etats-Unis; ces marchandises sont attribuées au pays d'origine Les données statistiques sont calculées et présentées pour chaqu pays mentionné à la page 9 de la présente publication. Les pays son disposés surtout selon leur situation géographique, mais ils son également répartis d'après leur affiliation à des groupes commerciaux et leurs accords tarifaires (par ex. les pays de la C.E.E., ceux du Commonwealth et les pays qui jouissent d'un tarif préférentiel). Dans les statistiques qui figurent dans la présente publication, *la Communauté économique européenne n'inclut pas le Danemark, l'Irlande et le Royaume-Uni, nouveaux membres depuis le 1er janvier 1973.*

Quantities: Tables 3 and 4 show quantities, where available, in terms of the units specified for each class in the "Import Commodity Classification," (cf. above), and defined on page 7 of this report. Measures of weight or volume generally exclude any packing required for shipment and numbers refer to complete (or substantially complete) units imported, excluding parts.

Valuation: The value of goods imported is based on the selling price f.o.b. point of shipment reported by importers. However, in the case of shipments valued under $50,000 or transactions between affiliated companies (other than automotive imports from the U.S.), the value recorded is the value for customs duty purposes determined according to the provisions of the Custom Act. All values in this report are presented in thousands of dollars, after appropriate rounding. Where the current or cumulative amount is less than $500, only quantity may be published for the country concerned. On account of rounding individually, differences may arise between totals and sums of constituent items.

Abbreviations: Designations of countries and commodities used in this report are often abbreviated or shortened. A key to abbreviations of countries appears on page 8 of this report, and comprehensive descriptions of commodities appear in the "Import Commodity Classification". The letters "n.e.s." mean "not elsewhere specified".

Revisions:

a. **Data for current month:** Statistics for the current month (i.e. the month which is subject of the report) in the "Preliminary Statement of Canadian Trade" and in the Summary of External Trade (65-001) have not been audited for reporting or processing errors with the exception of transactions of $100,000 or more. Figures for the current month in Imports by Commodities (65-007), Exports by Commodities (65-004), Imports by Countries (65-006) and Exports by Countries (65-003) are fully audited.

b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the reports for December have been published. Commodity/country subtotals revised by $10,000 or more are shown in the monthly report 65-007 and 65-004 in the month following their application (e.g. report 65-007 for June will show data revised in May for the months January through April of the current year).

c. **Monthly data for previous years:** Data for any year previous to the current year are subject to revision only in March of each year. Any monthly commodity/country figures revised at that time will be shown in the March issues of reports 65-007 and 65-004.

Note: Cumulative totals in all reports reflect all revisions applied up to the date of printing.

). **Treatment of Confidential Information:** It is occasionally necessary to withhold publication of details where commodity or country information is known to involve disclosure. The suppression of commodity-by-country detail, however, affects neither class nor country totals, which include all transactions reported during the calendar month.

6. **Quantités:** Les tableaux 3 et 4 donnent les quantités, lorsqu'elles sont disponibles, exprimées dans l'unité déterminée pour chaque classe dans la "Classification des marchandises d'importation," (mentionnée ci-dessus); les unités sont définies à la page 7 du présent rapport. Les poids ou les volumes sont mesurés nets de l'emballage nécessaire à l'expédition et les nombres représentent le nombre d'articles complets (ou presque complets) importés, sans les pièces.

7. **Valeurs:** La valeur des marchandises importées est basée sur le prix de vente, f. à b., au point d'expédition déclaré par les importateurs. Toutefois, dans le cas des expéditions d'une valeur inférieure à $50,000 ou des transactions entre des sociétés affiliées (autres que les importations d'automobiles des Etats-Unis), la valeur déclarée est celle fixée aux fins des douanes, en vertu de la Loi canadienne sur les douanes. Toutes les valeurs qui paraissent dans le présent rapport sont indiquées en milliers de dollars, après avoir été arrondies. Lorsque la valeur cumulative ou courante est inférieure à $500, seule la quantité peut être publiée pour le pays concerné. Etant donné que l'on a arrondi chaque valeur, il est possible que les totaux ne correspondent pas aux sommes des éléments constitutifs.

8. **Abréviations:** Les noms des pays et des marchandises cités dans le présent rapport sont souvent abrégés ou raccourcis. L'explication des abréviations des pays est donnée à la page 9 du présent rapport, tandis que les descriptions complètes des marchandises figurent dans la "Classification des marchandises d'importation," (mentionnée ci-dessus). Les lettres "n.d.a." signifient "non désigné ailleurs".

9. **Rectifications:**

a. **Données du mois courant:** Les statistiques du mois courant (c.-à-d. le mois visé dans la publication) figurant dans le "Communiqué préliminaire sur le commerce du Canada", le Sommaire du commerce extérieur (65-001) n'ont pas été vérifiées quant aux erreurs de déclaration et de traitement à l'exception des opérations d'au moins $100,000. Les chiffres du mois courant dans Importations par marchandises (65-007), Exportations par marchandises (65-004), Importations par pays (65-006) et Exportations par pays (65-003) ont fait l'objet d'une vérification complète.

b. **Données des mois précédents de l'année courante:** Les chiffres des mois précédents de l'année courante demeurent sujets à révision jusqu'à la parution des publications pour décembre. Les totaux rectifiés par $10,000 ou plus au niveau de marchandise/pays figurent dans les publications mensuelles 65-007 et 65-004 du mois qui suit leur application (par ex., le numéro de juin de la publication 65-007 présentera les données qui ont été rectifiées en mai pour les mois de janvier à avril de l'année courante).

c. **Données mensuelles des années précédentes:** Les données pour toute année antérieure à l'année courante sont sujettes à révision seulement en mars de chaque année. Les chiffres mensuels par marchandises/pays qui seront rectifiées à ce moment-là paraîtront dans les éditions de mars des publications 65-007 et 65-004.

Nota: Les totaux cumulatifs figurant dans toutes les publications prennent en compte toutes les rectifications apportées jusqu'à la date d'impression.

10. **Renseignements confidentiels:** Il est parfois nécessaire de supprimer le détail des données relativement à certaines marchandises ou à certains pays pour protéger le caractère confidentiel des données individuelles. La suppression du détail des marchandises par pays ne modifie toutefois pas les totaux par classe ou pays, qui comprennent toutes les opérations dont il a été fait rapport au cours du mois civil.

Commencing January 1, 1975, documents of imports from the United States valued at less than $2,500 each have been subject to a 10 per cent systematic sample to provide estimates for low-value imports from that country. Import documents from the U.S. exceeding $2,500 and all import documents from other countries, regardless of value, continue to be processed and compiled by complete count.

All documents are stored into homogeneous commodity groupings according to tariff item information on the document. The low-value documents covering imports from the U.S. are selected from each commodity grouping and are subject to a systematic sample with a random start.

Once the document is selected through the sample procedure, the value, quantity and customs duty of each sample line are mechanically inflated by dividing by the sampling ratio. For example, if the sampling ratio were 1/10, all lines shown on the sampled documents would be multiplied by 10, and the estimates thus derived are included with the complete count statistics.

It should be noted that the aggregate value of low-value documents of U.S. imports accounts for 4 per cent to 5 per cent of the import total, (6 per cent to 8 per cent for imports from the U.S.) but accounts for some 55 per cent of all documents (some 70 per cent of documents for imports from the U.S.).

The estimated $140 million a month of low-value U.S. imports is subject to a sampling variability of 2 per cent to 3 per cent. This means that there is a 2 in 3 chance of the estimated value differing from the "true" value by not more than 2 per cent to 3 per cent.

Estimates for individual commodity classes are of course subject to varying degrees of sampling variability. The closeness of individual estimation to "true" values also varies with the universe of documents selected for the particular class in any particular sample. While it is difficult to represent this in tabular form, readers should be aware that the odds against a particular estimate being close to the true value by a specified percentage increase quite rapidly as the universe of documents upon which the estimate is based decreases.

Depuis le 1er janvier 1975, on établit à partir d'un échantillon systématique de 10 p. 100 des documents concernant les importations d'une valeur inférieure à $2,500 des estimations sur les marchandises de faible valeur importées des Etats-Unis. Les données sur les marchandises valant plus de $2,500 importées des Etats-Unis et sur toutes les marchandises importées des autres pays, quelle qu'en soit la valeur, continueront d'être dépouillées et compilées exhaustivement.

Tous les documents sont répartis en groupes homogènes de marchandises, suivant les groupes du tarif douanier. Sur chaque groupe, on prélève les documents sur les marchandises de faible valeur importées des Etats-Unis et on procède à un sondage systématique dont le premier élément est choisi au hasard.

Pour chaque document sélectionné par sondage, on gonfle automatiquement la valeur, la quantité et les droits de douane figurant sur chaque ligne, en les divisant par le taux d'échantillonnage. Par exemple, si le taux d'échantillonnage est de 1/10, les données sur chaque ligne des documents sélectionnées sont multipliées par 10 et les estimations ainsi calculées sont incorporées aux résultats de la compilation exhaustive.

Il convient de noter que les documents sur les importations de faible valeur en provenance des Etats-Unis représentent de 4 p. 100 à 5 p. 100 de la valeur globale des importations (de 6 p. 100 à 8 p. 100 des marchandises importées des Etats-Unis), mais quelque 55 p. 100 de l'ensemble des documents (environ 70 p. 100 des documents sur les importations des Etats-Unis).

Vu qu'elle résulte d'un sondage, la valeur estimative des marchandises de faible valeur importées chaque mois des Etats-Unis (140 millions de dollars) peut varier de 2 à 3 p. 100 par rapport à la valeur "réelle". Cela veut dire que, dans 2 cas sur 3, la valeur estimative ne diffère pas de la valeur réelle de plus de 2 ou 3 p. 100.

La variabilité de sondage des estimations peut varier d'une catégorie de marchandises à une autre. L'écart entre chaque estimation et la valeur "réelle" varie également, dans tout sondage, en fonction de l'univers de documents sélectionné pour chaque catégorie. Il est difficile de représenter ceci sous forme de tableau, mais le lecteur ne doit pas oublier que le nombre de chances d'obtenir une estimation ne différant pas de la valeur réelle de plus de tel pourcentage diminue rapidement si l'univers de documents qui sert de base à l'estimation se restreint.
